

ODE ITC Call – 1/23/2023

Notes provided by Naja Bailey (META) and Gretchen Martin (ACCESS)

FY23 Initial Staff and Course Collection – We are nearing the end of the initial collection - the window closes on January 31, 2023. Encourage districts to review their data, and submit at least once in January to ensure any changes for the second semester are included. There are only 4 entities remaining who have not yet submitted this collection at all (emails went out to their ITCs this morning).

(TLCS-001) Teacher Licensure Course Status Report – ODE is still working on an update for the TLCS report. There is a provision in law regarding districts who perform at a certain level having expanded options regarding proper certification/licensure. ODE is trying to automate some of these processes so the information shows up in the report instead of being manually processed. Due to this, there is a possibility that there may not be new licensure reports on the morning of Thursday, January 26th. These reports would update Wednesday morning, and then not again until Friday morning. If they are able to get these changes in place and run QA on reports Wednesday night, then they will hold the reports on Thursday to confirm the reports in production are still correct. If all goes well, ODE may be able to push out reports later in the day on Thursday, but if issues arise reports won't come out until Friday. If ODE determines they are not ready for QA, they will just process normally on Wednesday night and hold changes until next week after the window closes. This is just a heads up on what may happen this week, so no one is caught off guard.

ODE ITC EMIS Training – The current round of trainings start today (January 23) and run throughout the week. Information is on the website - no pre-registration is required.
